

The Flying Barcoder™

A Radically Different Concept:

The Flying Barcoder™ prints and applies labels to the end of each board in an entire package, *after* it has come through the strapper.

This machine is the first of its kind, and cannot be found anywhere else in the world.

- 99+% label placement accuracy
- Manual intervention is eliminated
- Line speed is not an issue
- Ability to barcode an entire package as fast as 90 seconds
- Labels print completely clear and readable
- Because of location, there is less wear and tear on the machine
- Sensor protection virtually eliminates potential damage
